

Project Design Phase

Problem-Solution Fit Template

Date	06 NOVEMBER 2025
Team ID	NM2025TMID03796
Project Name	LEASE MANAGEMENT

# Identified Problem	Proposed Solution	Expected Outcome / Impact
1 Manual lease tracking causes errors and missed payments	Develop an automated system to send rent reminders and record transactions	Reduces manual effort, ensures on-time payments
2 Lease documents often get misplaced or lost	Provide secure cloud-based document upload and storage	Ensures data safety and easy access anytime
3 Tenants and owners have poor communication regarding lease status	Create a centralized dashboard to view lease, payment, and renewal info	Improves transparency and collaboration
4 Difficulty in tracking lease renewal dates	Implement auto-alerts and renewal notifications	Prevents missed renewals and improves compliance
5 Lack of analytical insights for decision-making	Integrate dashboard analytics and reporting tools	Helps owners analyze performance and income trends

✔ Explanation

The Problem–Solution Fit focuses on validating that the system features solve genuine customer pain points. Each problem was gathered from user feedback (owners, tenants, and admins), ensuring the final solution design aligns with their real needs.

By mapping every issue to a specific solution, the team can prioritize the most impactful features.

📘 Example (Visual Summary)

Problem Area	Solution Approach	Tools / Technology Used
Data Mismanagement	Centralized database with CRUD operations	Salesforce Objects / SQL
Payment Delays	Automated reminder notifications	Process Builder / Flow
Document Handling	Digital file upload and cloud storage	Salesforce Files / Google Drive
Reporting	Dashboard and analytics view	Salesforce Reports / LWC Charts
