Define the Problem Statements

Date	06 NOVEMBER 2025
Team ID	NM2025TMID03796
Project Name	LEASE MANAGEMENT

Customer Problem Statement Template:

Category	Description
Customer Segment	Property owners, tenants, and administrators involved in lease management.
Current Situation	Leases and rent tracking are handled manually using paper documents or Excel sheets.
Customer Problem	Missed rent payments, lost documents, lack of reminders, and poor visibility in lease data.
Impact on Business	Causes confusion, delayed payments, and reduced trust between owners and tenants.
Customer Need	A centralized platform to manage lease agreements, automate reminders, and generate reports.
Proposed Solution	Develop an online Lease Management System with automation, document storage, and analytics.

Identified Problem	Proposed Solution
Manual lease tracking and missed payments	Implement automated reminders and rent notifications
Lost lease documents	Provide secure digital document upload and storage
No quick access to records	Create centralized lease database accessible from anywhere
Difficult renewal management	Automate lease renewal alerts and approval workflows

EXAMPLE:

Feature	Before (Manual)	After (Automated System)	Feature	Before (Manual)	After (Automated System)
Rent Reminders	Manual calls or messages	Automated SMS/Email reminders	Rent Reminders	Manual calls or messages	Automated SMS/Email reminders
Lease Records	Stored in files	Stored in a centralized database	Lease Records	Stored in files	Stored in a centralized database
Document Security	Prone to loss or damage	Encrypted and cloud-stored	Document Security	Prone to loss or damage	Encrypted and cloud-stored

Report Generation	Time-consuming	Real-time analytics dashboard	Report Generation	Time-consuming	Real-time analytics dashboard
Lease Renewal	Easily forgotten	Automatic renewal notifications	Lease Renewal	Easily forgotten	Automatic renewal notifications

✓ Problem Statement PS 1:

The current lease management process involves **manual tracking and physical record keeping**, leading to inefficiencies, data loss, and communication gaps.

Due to lack of automation, property owners often miss rent collection dates, while tenants receive no proper reminders or digital proof of payment.

There is a need for a **systematic digital approach** to manage leases, store documents securely, and ensure timely communication between all stakeholders.

✓ Problem Statement PS 2:

Managing multiple lease agreements manually creates **data inconsistency and administrative burden**.

Owners struggle to monitor multiple properties, while tenants face confusion during renewals or updates.

To solve this, a **Lease Management System** should automate reminders, centralize data storage, and generate real-time reports — ensuring transparency, efficiency, and accountability.
